

COVER MODEL CARLA ATTACHED

Cover with fixed aluminium structure supported on a wall with one or two earrings composed of modules of 2.09 m in length between axles, each module is equipped with side hatches elevating type guillotine up to the ceiling, which allows the ventilation of the premises to 90%.

Independent high and low hatches manipulation allows a combination of the opening of the cover in function of the station and the climate.

Indoor fixed model is the only one that offers a true security barrier to prevent access by children and pets without the supervision of an adult.

Standard Colors:

- White RAL 9010
- Green RAL 6009
- Beige RAL 1015

* Option: any other color of the RAL or finished wood.

- Polycarbonate ribbed sheets clear and polycarbonate compact clear.
- Two fixed assets with sliding doors double stations.
- Height of step under trap doors of 1.95 m.
