

COVER MODEL CARLITA

Cover with fixed aluminium structure composed of modules of 2.09 m in length between axles, each module is equipped with side hatches elevating type guillotine up to the ceiling, which allows 80% enclosure ventilation.

Independent high and low hatches manipulation allows a combination of the opening of the cover in function of the station and the climate.

Indoor fixed model is the only one that offers a true security barrier to prevent access by children and pets without the supervision of an adult.

Standard Colors :

- White RAL 9010
- Green RAL 6009
- Beige RAL 1015

Option: any other color of the RAL or finished wood.

- Height Max in the center of the cover of 1.80 m.
- Polycarbonate ribbed sheets clear and polycarbonate compact clear.
- Two fixed assets with sliding door central of a sheet.
- Height of step under 1.50 hatches m at a minimum width of 6.0 m.
