

COVER MODEL LARA

Cover with fixed aluminium structure composed of modules of 2.10 m length, each module is equipped with sliding doors on both sides, which allows the ventilation of the premises to 90%.

The opening or closing of sliding doors allows for ventilation of cover depending on the season and climate.

Indoor fixed model is the only one that offers a true security barrier to prevent access by children and pets without the supervision of an adult.

Standard Colors:

- White RAL 9010
- Green RAL 6009
- Beige RAL 1015

Option: any other color of the RAL or finished wood.

- Polycarbonate ribbed sheet clear (polycarbonate compact clear option).
- Two funds fixed transparent sliding doors with double stations.
- Height side maximum of 2.04 m.
